ISRAEL AT DEFENSE & SECURITY 2017

The South-East Asia is a vivid region undergoing an impressive economic growth and international cooperation between nations.

Yet, the threats of piracy and terror along with the need to secure Exclusive Economy Zones create a need to boost military and security forces.

The Israel Pavilion is highlighting a wide scope of Defense Systems, Cyber Defense and Homeland Security solutions, addressing the needs of military forces, counter terror and law enforcement organizations and other government agencies, based on the Israeli extensive operational experience.

Among the advanced capabilities highlighted by the Israeli exhibitors are the modernization and improvement of existing or new Weapon Systems, Robotic and Unmanned Systems, C^4I Systems, Counter IED Systems, Armored Vehicles, PGM, Artillery, and Cyber Security Systems.

Visitors to Defense & Security 2017 in Bangkok are invited to reveal the wide range of solutions presented by Israel's leading industries and to explore possibilities for future cooperation with Israel's defense companies.

Designed by
“Shapira Waxman”

ISRAEL MINISTRY OF DEFENSE

SIBAT

INTERNATIONAL DEFENSE COOPERATION

SIBAT - ISRAEL MINISTRY OF DEFENSE

SIBAT, the International Defense Cooperation Directorate of the Israel Ministry of Defense (IMOD), is uniquely positioned within the IMOD,while having a close, ongoing relationship with Israel's defense industry.

This combination ensures that SIBAT maintains in-depth and up-to-date knowledge of the defense world's relevant concepts, as well as a clear understanding of the Israel Defense Forces' (IDF) operational needs.

SIBAT facilitates international cooperation through its various services:

- Generating Government–to-Government agreements
- Initiating visits of official foreign delegations
- Identifying cooperation opportunities with the Israeli defense industry
- Locating relevant technological solutions for specific requirements
- Establishing joint ventures
- Managing the marketing and sales of IDF inventory
- Providing in-depth information on Israel's defense industry through a biennial directory and by organizing the Israel national pavilions at international defense exhibitions

Aeronautics Group

AERONAUTICS GROUP

Aeronautics group is a world leading developer and manufacturer of defense solutions based on Unmanned Aerial Systems (UAS) and advanced Surveillance, and Target Acquisition and Reconnaissance (ISTAR) systems. Aeronautics' UAS line of products enables the military, homeland security and law enforcement customers to ensure the safety of millions of people.

As a specialist in the field of unmanned ISTAR, Aeronautics group's in-house vertical integration capabilities facilitate rapid delivery of tailored turnkey solutions to its customers. Since its establishment in 1997, the Company's products have been delivered to and successfully deployed by over 70 defense, military and homeland security forces in more than 50 different countries.

Together with its subsidiaries, Commtact (100%), Zanzottera (100%), Controp (50%) RT (51%) and PoziDrone (100%), Aeronautics group offers a 'one-stop-shop' for cost-effective solutions for Defense, HLS and border control missions.

Among Aeronautics' leading unmanned aerial systems are:

- Orbiter 4 Small Tactical UAS
- Pegasus 120 Tactical VTOL UAS
- Orbiter 1K loitering munition UAS
- Orbiter 2 Mini UAS
- Orbiter 3 Small Tactical UAS
- Aerostar Tactical UAS
- Dominator MALE UAS

ASTRONAUTICS C.A. LTD.

Astronautics is a leading supplier of defense and aerospace electronics, with a strong reputation for innovative and highly reliable products and solutions.

Our solutions for aviation include products, systems and embedded-cyber protected systems. Astronautics also provides embedded cyber threat analysis services, mapping possible attack vectors to a specific platform, with practical solutions to defend platforms against cyber-attacks.

Thousands of aircraft use Astronautics' flight instruments, displays, computers and components.

Our solutions for Land include Automated Tactical Artillery Control Systems (ATACS) for various artillery platforms (self-propelled howitzers, towed guns, mortars & Multi Launch Rocket System (MLRS)), Gun Laying and Positioning Systems (GLPS), Artillery Battle Management Systems (ABMS) and Forward Observer Systems (FOS).

Astronautics supplies:
Our products include military, naval and airborne computers, cockpit displays, air data computers, engine data concentrators and more.

Our System Level Solutions are: • TactiX – Tactical Mission Systems for helicopters, transporters and mission aircraft • Electronic Flight Bag (EFB) – Civil certified Electronic Flight Bag for military and civil-aviation use
• Glass-Cockpit Civil Certified Avionics (GCCCA) – Full glass-cockpit modernization, including primary flight display, navigation display, engine display, flight management system and more. We offer glass-cockpit solutions for transporters and helicopters • Converting older engine instrument panels to a full digital Engine Instrument & Crew Alert System (EICAS) • Airborne, Land and Naval embedded cyber protection packages – Onboard add-on device to detect and protect the system against malware and cyber-attacks. Solutions may be provided as a standalone unit, or embedded in Astronautics' computers and smart displays.

CAMERO
Step into the known
SK GROUP MEMBER

CAMERO - TECH LTD.

TACTICAL TROUGH-WALL IMAGING SYSTEMS

Camero, an SK Group member, is a world leading provider of Sense-Through-The-Wall (STTW) solutions. Utilizing unique pulsed based UWB micro-power radar technology. Camero's solutions provide real time information on multiple stationary and moving objects concealed behind walls and barriers providing operators with unprecedented situational awareness and operational advantage.

The Xaver™ products have become the solution of choice for top military, law enforcement agencies and search and rescue teams throughout the world and have been successfully operationally deployed in more than 40 countries worldwide.

The Xaver through wall radar product line includes:
Xaver™ 800 - a high performance full 3D imaging solution for ISR applications,
Xaver™ 400 - Compact, Tactical Through the Wall Imaging System
Xaver™ 100 - a compact handheld through the wall life detector
XaverNet™ – Remote Wireless ToughPad for Xaver™ 400 and Xaver™ 100

SK GROUP

Camero-Tech is a member of SK Group, a leading global defense and security group of Companies comprising: Israel Weapon Industries -IWI Ltd. (firearms manufacturer), Meprolight Ltd.(electro-optic, lasers and night vision systems), Israel Shipyards Ltd. (ship manufacturing and repair), Uni-Scope Ltd. (optical periscopes) and more.

CONTROP
Turning Vision Into Reality

CONTROP PRECISION TECHNOLOGIES LTD.

CONTROP specializes in the development and production of Electro-Optical and Precision Motion Control Systems.

CONTROP's products are used worldwide for Defense and Homeland Security surveillance applications on air, land and maritime platforms. CONTROP's specialists have over 30 years of experience in electro-optics, electronics, servo-control, precision mechanics and software.

CONTROP's products have many years of proven operational success and have been the chosen Electro-Optical (EO) systems for many national and international requirements.

CONTROP's main product lines include:

- High performance Stabilized Observation Payloads of many sizes and weights used for day and night surveillance on board UAVs, small UAVs, aerostats/balloons, helicopters, light aircraft, maritime boats and ground vehicles.
- High performance airborne wide-area coverage (real time) EO Stabilized Payloads for day and night surveillance.
- Automatic passive Intruder Detection Systems for the real time panoramic security of sensitive sites, airports, coastal surveillance, port/harbour security, border surveillance, perimeter security and surveillance and ground troop security.

CONTROP's QA is ISO-9001 certified and the company's products are in daily operational use on many different vehicles and programs, worldwide.

EMTAN KARMIEL LTD.

ISRAEL SMALL ARMS INDUSTRY

EMTAN KARMIEL LTD., is an Israeli Manufacturer of small arms, guns and weapons with over 40 years of experience and knowledge.
EMTAN employs over 120 skilled personals in a sophisticated computerize facilities that insures optimized manufacturing and quality. Our goal is to deliver the end-user a reliable robust weapon within budget.
EMTAN MZ Rifle range:

- MZ-4- 5.56mm NATO, fully automatic rifle
- MZ-47- 7.62X39mm, fully automatic rifle, compatible with AK47 gun magazines and accessories
- MZ-10- 7.62x51mm NATO, fully automatic rifle
- MZ-300- 300 Blackout, fully automatic rifle for covert operations
- MZ-9- 9mm NATO, fully automatic sub machine gun
- MZ-15- semi -automatic rifle, suitable for ammunition type: 7.62mm, 5.56mm or 223 (for commercial uses as hunting and sports)

Based on the known M4-M16, EMTAN's small arms are designed and manufacture according to MIL-SPEC to suite the utmost requirements of any army or police force.

- EMTAN's MZ4 parts are fully compatible with other M4 and M16 rifles, enabling the company to offer upgrading conversion kits for renewing of used M16 and M4.

EMTAN's innovation and R&D in materials and processing technology and using the most updated machinery results in a rifle that is more reliable, more accurate and more ergonomic than the standard issue rifles used by armed forces.
EMTAN holds valid of ISO 9001certification and the AS 9100 certification of the Aviation, Space and Defense industry.
EMTAN is approved by the Israel MOD for manufacturing and exporting of small arms, guns and ammunition.

FAB DEFENSE®

KEEP IT REAL.

FAB-DEFENSE®

Since its inception, FAB-Defense® has been the leader in the developing and manufacturing of top-quality, cutting-edge tactical equipment and weapon accessories for the State of Israel's Military and Police forces.

The FAB-Defense® R&D department works in close collaboration with special forces and SWAT teams worldwide to design creative, ability-enhancing, no-nonsense solutions for the ongoing dynamic challenges met in the field.

Superior ergonomics, functionality and durability are achieved by decades of design experience combined with state-of-the-art engineering and manufacturing technologies followed by rigorous and uncompromising quality assurance methods.

Our primary objective is to provide our customers - law enforcement and military personnel - with the tools they need to successfully carry out their missions, providing them with the edge they need in modern-day battlefield.

IAI- ISRAEL AEROSPACE INDUSTRIES LTD.

Israel Aerospace Industries (IAI) is a world leader in the delivery of state-of-the-art ground, air, sea, space, and cyber technologies and systems for defense, commercial, and homeland security applications. Drawing on over 60 years of experience developing and supplying innovative, cutting-edge systems, IAI exports its products to over 90 countries and has over 30 subsidiaries worldwide.

IAI's defense and commercial products and services include: electronic systems, avionic suites, advanced radars, tactical weaponry and law enforcement systems, training and simulation systems, network and situational awareness systems and the development, manufacture, overhaul, upgrading, repair and maintenance of aircraft and aerospace equipment.

At Defense and Security 2017, IAI will be presenting some of its cutting edge, end-to-end solutions. With comprehensive in-house technologies and production infrastructure, IAI is able to provide complete, integrative solutions that are tailored to the unique security challenges facing each customer.

IMI SYSTEMS
MEETING YOUR TARGETS

IMI SYSTEMS LTD.

Established in 1933 as Israel Military Industries, IMI Systems is a defense systems house specializing in the development, manufacturing, marketing and implementation of end to end combat-proven solutions for the land, air, naval and homeland security (HLS) requirements of the modern battlefield.

As a reputable company, positioned among the world's leader defense solution providers, IMI Systems exports 70% of its products to its customers around the world. The advanced defense systems offered by IMI Systems were developed based on extensive operational experience, advanced technology, and exclusive methodologies and are used by the IDF, US Military (Air Force, Army and Navy), NATO nations and military and government agencies in over 70 countries worldwide.

The nationwide company is wholly owned by the Government of Israel, employs 3,000 employees in its 6 business units: Armor, Infantry, Artillery, Air, HLS and Small Caliber Ammunition as well as in its variety of manufacturing, test and laboratories' facilities and has two subsidiaries: the IMI Academy for Advanced HLS training and Ashot Ashkelon Ltd.

MEPROLIGHT®
SK GROUP MEMBER

MEPROLIGHT (1990) LTD.

Optics • Night Vision • Thermal • Tritium • LRF

Meprolight (1990) LTD. an SK Group member, is a leading electro-optics company founded in1990 and headquartered in Israel. Meprolight addresses the needs of the military, law enforcement and civilian communities for innovative and reliable day and night sights and devices, as well as thermal and self-illuminated tritium products. Meprolight designs, manufactures and markets a wide array of combat- proven products and solutions:

- **Optics** - electro-optical and optical sights and devices.
- **Night Vision** - night vision sights and observation systems.
- **Thermal** - uncooled thermal weapon sights.
- **Tritium** - a variety of self- illuminated tritium night sights and other tritium products.
- **LRF** - a wide range of innovative OEM laser rangefinders.

All of Meprolight's products undergo meticulous quality assurance according to international standards.The company is certified to ISO 9001:2008, ISO 18001 (2007) and ISO 14001 (2004) complying with NATO and US military specifications and International MIL standards.
State-of-the-art technology combined with high reliability and simplicity of use have made Meprolight the vendor of choice among military forces, law enforcement agencies, defense agencies and weapon manufacturers.

MER GROUP

With vast experience and a solid reputation earned through proven global successes, MER Group is a world-leading integrator of tactical communication solutions and emergency situation management, and an innovator in cyber security.

The group's diverse portfolio of end-to-end technology-based solutions includes consulting, development, manufacturing, integration, implementation and turnkey projects that are impeccably planned and executed, from start to finish.

In the fields of defense and emergency response, MER's innovative network-centric interoperability communication and wireless LTE solutions are modular, scalable and combat field-proven. This product line has been deployed at sites worldwide, meeting a wide range of radio and non-radio interoperability needs.

For emergency situation management, MER provides tailored, end-to-end services, building and implementing operational concepts that bring together three key areas: people, processes and technology.

The group's seamless, comprehensive suite of cyber solutions and services leverages its unique experience in both cyber warfare and threat intelligence.

Promising to dynamically gauge and analyze the performance of cellular networks, MER offers revolutionary SON solutions to enhance transmission parameters, delivering network optimization and higher network capacity. MER Group (TASE: CMER) employs approximately 1200 people with dozens of global subsidiaries and operations in Latin America, Africa, USA and Israel.

NETLINE COMMUNICATIONS TECHNOLOGIES (NCT) LTD.

Netline Communications Technologies (NCT) Ltd. develops, manufactures, and sells cutting edge electronic countermeasures and spectrum dominance solutions: advanced SIGINT, communication & counter IED jamming, and cell phone detection systems to the global defense, enterprises and homeland security markets, since 1998.

Netline's vast and varied experience, together with our expertise, enable us to continue providing the most professional solutions ensuring full spectrum dominance for each client, based on mission needs, relevant threats and field constraints.

Netline's field-proven experience includes massive installation of jamming systems by US, NATO and other coalition forces, within armored vehicles and VIP convoys, operating in conflict zones.

Netline's SIGINT systems are continuously used on a daily basis by security forces around the world for peace keeping missions, counter terror activities and other HLS applications.

Our security experts constantly trace and analyze market changes and trends. Netline's multi-disciplinary R&D division continuously innovates, develops and customizes systems according to clients and missions complex demands.

NIMDA DIESEL GROUP

With over four decades of success in the upgrade and modernization of military and commercial vehicles, Nimda is well known world-wide as a provider of power packs and advanced automotive applications, the assembly and installation of power-trains for ground forces and marine propulsion systems as well as various platforms' modernization via the integration of advanced weapon systems for anti-tank and air defense uses. Acting as a main supplier for its main customer - the Israel Defense Force (IDF) Nimda has been providing products and solutions for a variety of applications and has applied its knowhow to enhance its contribution to its customers with newly developed technologies.
While based in Israel with branches in the U.S. and in Europe, Nimda Co. is an expert in turn-key projects for tanks and APCs (wheeled or tracked types), MBTs, amphibious armored vehicles and its portfolio includes vehicles of U.S., British, French and Russian origin. Nimda Also shares knowhow with its customers, through the construction of local infrastructure including logistic centers, military work-shops and vehicles production plants.

- T-72 Tank – Advanced modernization
- M-109 – Self Propelled Howitzer, SPH -Upgraded new system
- M-113 A3 APC – New system upgrading
- M-41 Light Tank – Complete retrofit.
- T-55 Tank – New Modernization
- Heavy APC "Achzarit" – Total manufacturing
- M-60 A1/A3 Tank – New upgrading
- PT-76 Light Amphibious Tank – Complete modernization
- BTR-50 Tracked APC – Complete modernization
- BMP II – New concept modernization

Sasa Software
Smart Made Simple.

SASA SOFTWARE

Sasa Software is a leading cyber security provider of extensive content sanitization and deep malware removal solutions. We specialize in securing the organization's critical content delivery channels:

Emails, internet downloads, file transfers, detachable media, and more. Our innovative GateScanner® suite of products disarms incoming content, eliminating threats from all files and emails, protecting against known, unknown and undetectable threats, including ransomware. GateScanner® can be easily integrated with other security solutions, leveraging their capabilities.

We protect over 160 enterprises, focusing on governmental agencies, financial institutions, healthcare and critical infrastructures. Among our customers are the Singaporean Ministry of Foreign Affairs, the majority of Israel's government offices, Teva Pharmaceutical Industries, leading banks, hospitals, and many other highly sensitive organizations.

Sasa Software was recently awarded the 2017 Frost & Sullivan Asia Pacific ICS Security Vendor of the Year.

SemiConductor Devices

SCD – SEMI CONDUCTOR DEVICES

SCD is a worldwide leader in design, development and manufacture of infrared detectors and laser diodes. SCD leverages its successful 40-year leadership to meet and exceed the demands in the EOIR Defense, Home Land Security (HLS) and Commercial markets. SCD adheres to the highest standards and strives to offer aggressive specifications for Airborne, Maritime, Land, and Space applications. As a world leader in infrared technology, SCD continues to invest heavily in innovation.
All recent generations of detectors at SCD are digital. Our customers enjoy end-to-end support and service at the highest levels and standards.
SCD supplies its detectors to leading Israeli defense industries, as well as worldwide leading defense, HLS and commercial industries – In North America, Europe, Far East and more. SCD's unique capabilities and technologies are deployed in its extensive range of Cooled and Uncooled detectors based on a variety of materials such as InSb, MCT, InGaAs, T2SL and VOx, and are available in almost any video format: QVGA, VGA, XGA, HD. SCD offers both off-the-shelf detectors and tailor-made solutions which are available all across the infrared spectrum: NIR, SWIR, MWIR, and LWIR and are usually integrated in Missile Seekers, Fire Control Systems, Commander Thermal Sight, Hand Held Applications, Long Range Surveillance, Border Security and Costal security, Airborne Payloads, Thermal Weapon Sights (TWS), Night Vision Driving Systems (NVDS), Missile Warning Systems (MWS).

SHLADOT

SHLADOT LTD.

For over four decades **Shladot** has been a leading provider of automotive and mechanical solutions for the commercial and military industries. **Shladot** operates in three main fields:

Mobilized Defense Solutions - Mobile defense and security platforms including turn-key Command, Control, Communications, Computers and Intelligence (C4I) shelters, gen sets and Heating, Ventilation and Air Conditioning (HVAC) solutions, trailers for various purposes, heavy duty battle-tank transporters, liquid transport solutions, special purpose vehicles and other platforms.

Armored Vehicles – Using commercial off-the-shelf platforms as a base for its armored vehicles, Shladot provides two main vehicle families –

- The **"Tiger"** Family – based on Ford, Dodge or heavier platforms with a Gross Vehicle Weight (GVW) of 9-12 ton. The Tiger is offered in a variety of armor levels and seats up to 14 passengers.
- The **"David"** Family – based on Toyota components, with a GVW of 4-4.7 tons and seating for up to 8 passengers. The David is built around the Toyota Hilux or Land Cruiser pick-up trucks, is available in various armor levels, and offers options such as a 24V system, gun ports, run-flat inserts and others. Three, four and five door options provide SUV or troop-carrier seating arrangements. The David is widely used by the Israel Defense Force.

Shladot also up-armors a variety of platforms, based of customer mission profile.

Aircraft Armor - Ballistic protection for helicopters and cargo aircraft using lightweight, composite armor panels that are custom designed to each customer's threat level and weight available for armor.

VERINT
POWERING ACTIONABLE INTELLIGENCE

VERINT CYBER INTELLIGENCE

Verint Cyber Intelligence is a global provider of security and intelligence data mining software designed to neutralize and prevent terror, crime and cyber threats.

We provide comprehensive security intelligence solutions that are all developed in-house. These solutions are based on Verint domain expertise and backed by twenty years of successful deployments of small and large projects around the world. With our broad and deep product portfolio, we offer clients the ability to collect intelligence from the full spectrum of communications, to assess and analyze the data, to investigate, and to take action—even when data is encrypted.

Our solutions are used for a wide range of applications, including preventing criminal activity and terrorism, predictive intelligence, advanced and complex investigations, security threat analysis, electronic data and physical assets protection, and for generating legal evidence.

We deploy our solutions globally—including software, hardware, and services—for governments, critical infrastructure providers, and enterprise customers. Our vision for security and intelligence data mining solutions is powered by the Verint Actionable Intelligence® platform to generate intelligence and insights from both structured and unstructured data.
