

MAGAL SECURITY SYSTEMS LTD.

Veecon-Magal Security Systems is a world leading provider of integrated security solutions and products for physical security. The company specializes in security products related to Perimeter Intrusion Detection Systems (PIDS) such as taut wire, buried cable and fence mounted sensors (fiber optic and others).

With its state of the art Command and Control software – Fortis 4G – Veecon-Magal has the capability to provide integrated turnkey security solutions that can also include complementary technologies by various manufactures.

In India, Veecon Magal has a support team of more than twenty well trained engineers offering 24X7 comprehensive installation and maintenance services all over the country.

Veecon Magal enjoys a proven success record in a variety of high-end security projects for airports, seaports, nuclear, oil and gas facilities, borders and border crossings, prisons, utilities and industrial campuses, safe & smart cities and other critical infrastructure.
