

DOUBLE SHOOT LTD.

ShDouble
oot

Double Shoot Ltd. is a rapidly growing Israeli startup that combines two of Israel's greatest strengths: Combat Capabilities and Technology. Double Shoot provides an extremely unique and advanced system to quickly and efficiently zero high accuracy weapons and advanced scoring system. The platform utilizes an advanced image processing system deployed via Smartphone. Double Shoot utilizes data-based analysis within a restricted web interface in-order to provide a wide-spectrum of reports to not only individuals and instructors but to entire units, HQ and the staff levels.

Double Shoot reduces the time and amount of ammunition needed to properly zero weaponry by 30%-50%. Double shoot can, therefore, lead to a significant reduction in time, cost and manpower required at the shooting range, shooting practices and beyond.

We have granted a patent in Israel and have filed an International patent application.

About us:

Oren Avman is a retired IDF Brigadier General, has acquired more than three decades of front-line combat experience while commanding every level of framework, from company to division. His last positions include: Division Commander, Commander of Company and Battalion commanders' course and head of TRADOC (Training & Doctrine) Division.

Tal Tinichigiu-Abergil is an IDF Reserve Captain who specializes in shooting and weaponry instruction, having served for more than five years as the head of the Weaponry Instruction Branch for the IDF Counter-Terror School.
