

CI SYSTEMS LTD.

CI Sytems founded in 1977 and is a leader in the development and production of sophisticated Electro-Optical Test Equipment and Measurement Systems for defense/homeland security, industrial, scientific and commercial applications, worldwide.

CI Systems provides products, ranging from standard to custom application specific solutions designed to meet multiple application needs, including:

- Test, simulation and development equipment for missile warning systems for airborne, marine and land-based defense platforms
- Test and development equipment for weapon sights based on FLIR technology, night vision, targeting and observation systems, laser range finders, and heatseeking missile systems
- Boresight & line-of-sight alignment systems for payloads on airborne platforms that require precision alignment, calibration and integration of multiple subsystems including lasers, FLIR and CCD technology, for maximum targeting accuracy
- Electro-Optical boresight equipment for precision alignment of armament sights with weapons fire control systems
- Remote sensing systems for signature analysis and development of FLIR, counter-measures, camouflage, and explosives detection
