

# PCB TECHNOLOGIES LTD.

PCB Technologies Ltd is the leading Israeli manufacturer and supplier of technologically complex and advanced multi-layer printed circuit boards (PCBs), Printed Circuit Boards Assemblies (PCBA) and Electro-Mechanical assemblies for various industries – telecommunications, medical, industrial, military and aerospace.

We provide a wide range of advanced printed electronics including; PCB, Flex, Rigid-Flex, hybrid PCB, microwave PCB, assemblies, and electro-mechanical assemblies.

- One-stop manufacturing. We offer one-stop manufacturing board fabrication assembly and electro mechanical assemblies. This one-stop solution enables us to provide a broad technology to meet our customer needs.
- Quick-turn services. We deliver high technology advanced printed circuit boards and assemblies in a short lead time. This enables our customers to reduce the time from prototype to production.
- Military and Aerospace capabilities. We offer a wide product portfolio for the Military

and Aerospace market leveraging our expertise and special knowhow in exotic material integration into Printed Circuit Boards fabrication and assembly.

- Strong process and technology expertise. We manufacture and assemble technologically advanced and complex boards utilizing our vast process experience and expertise.

PCB Technologies has over 700 employees and more than 30 years of experience in the electronic manufacturing field.

We Think Global and Act Local.

- Customer focused organization
- World class engineering
- Diverse client base
- Technologically advanced with unique capabilities Quality
- Certifications include: Nadcap, ISO AS9100, ISO 14001, ISO 13485, UL, MIL 50884 (Adhesive & Adhesiveless), MIL-PRF 55110 (various materials), Lead Free - fully compliance with the ROHS regulation.
