

## BLER SOLUTIONS LTD.

BLER develops innovative security and cyber intelligence solutions to meet a wide range of operational needs and preventing security threats for enterprise organizations, finance, banking and government agencies. BLER's platforms are integrated into enterprise grade investigation-support solutions and are used to conduct business intelligence, criminal and terror investigations.

The system gathers information about the targeted suspect from a wide range of social networks, web applications and from the Dark WEB, generating an accurate target profile from basic information.

The system, in fact, constructs a detailed identification card for the suspect. Furthermore, it has cutting edge analytics algorithms such as Link Analysis, Face Detection, Face Recognizer, Image Analysis, which helps Provisionals in their Investigative activities. The BLER system has the ability to keep tracking and gathering essential information using an e-mail address or an online nickname.
